Software

Deep fullstack technical knowledge. Passionate about user experience, personal growth and emerging technology.

Professional Experience

Global Village English Marketing

May, 2015–Dec, 2020

Fullstack webdev and sysadmin

Vancouver, BC

- Optimize website for small devices and slow international clients. In a team, using HTML, CSS and JavaScript for a PHP backend plan and redesign the gvenglish.com website for small iPhone device sizes and a faster load speed for international students.
- Speedup website, debug and correct MariaDB SQL server performance problems and configuration issues
- Track down potential security issues, scrape and filter server logs and application CSV files with Python.
- Coordinate and plan issues and long-term goals using the Mojohelpdesk ticketing system and the teamwork.com project tracking web applications.

Ruckify

February, 2021–June, 2021

Contract Web Development

Vancouver, BC

- Help upgrade website to a more maintainable, mobile friendly, readable and accessible website style by updating fonts, colours, buttons and widgets to the new style guide using Angular, web components and PHP templates.
- Pad and rework footer HTML and CSS to be more mobile friendly
- Coordinate work with pull requests with gitlab, dev-docs and Slack
